

Task 1

It involves creating a one-page infographic to spread awareness about digital literacy. The aim is to present important information in a simple, visual, and engaging format so that students can easily understand it.

In this task, a design tool such as Canva or Google Slides is used to create the infographic. The content should cover topics like what digital literacy is, safe internet practices, useful digital tools, and professional online behaviour.

This task helps in improving creativity, design skills, and the ability to communicate information clearly through visuals.
